MEMORANDUM FOR: Chief, Exploratory Development Laboratory Branch  
Plans and Development Staff

THROUGH: Chief, Development Branch  
Plans and Development Staff

SUBJECT: Request for Support

1. The development Branch is contracting for the development of a Diazo Light Table/Printer which will produce transparent diazo prints having a density range of 0.05 to 1.80 measured with a standard diffuse densitometer.
2. In order to test the printer, a step wedge is needed that has 18 steps between the quoted density values. Since this is a non-standard wedge, it is requested that such a wedge be made by the laboratory. The size of the complete wedge should be smaller than 9 inches square.
3. Time and materials expended should be charged to Project #997116.
